```

# EASING INTO WEB DEVELOPMENT

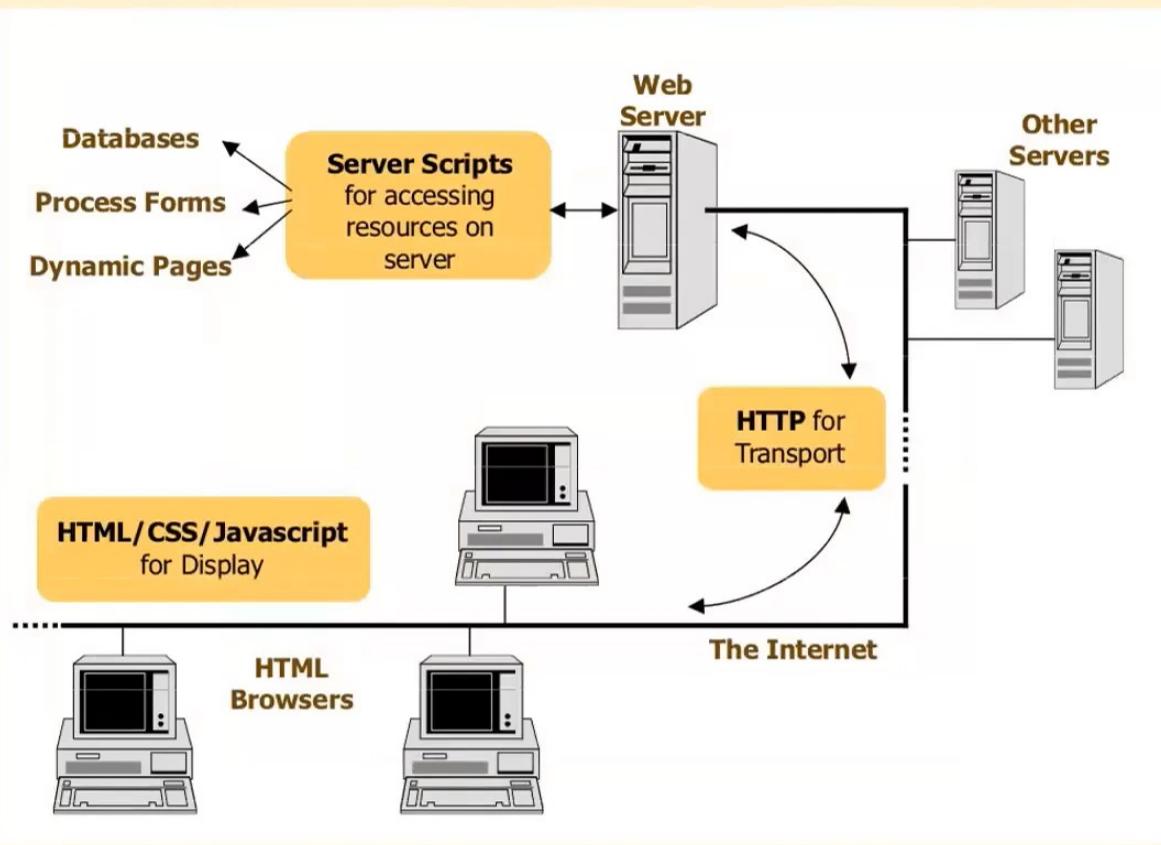

A black and white photograph showing a person's hands typing on a keyboard. In the background, a computer monitor is visible, displaying a blurred image that suggests a web development interface. The overall composition is focused on the hands and the keyboard, with the background being out of focus.

INTRODUCTION

# HOW DOES WEB WORK ??

1. The Browser (or client) request and display information.
2. Browser makes requests of servers, then server process the requests based on set of rules (called a Protocol).
3. On the server, a web server software process the request and returns information to the client.

# SYSTEM WORK FLOW

---

## Web Site Structure

A website is typically composed of many files.

A website will have:

### **HTML files**

These are ASCII text files, Most site will have many HTML files

### **Image files**

There are two file formats (GIF and JPEG) which is supported by all browsers

### **Object files**

Sound files, Video files, Flash files, Java files

### **Server side scripts**

Typically ASP, [ASP.NET](#), JSP, Cold fusion

---

# BASIC WEB DEVELOPMENT PROCESS

Create HTML file(s)

Test Locally on browser(s)

Upload file(s) to web server

Upload via FTP

Test page(s) on web server

# **STATIC      VS      DYNAMIC      WEB PAGES**

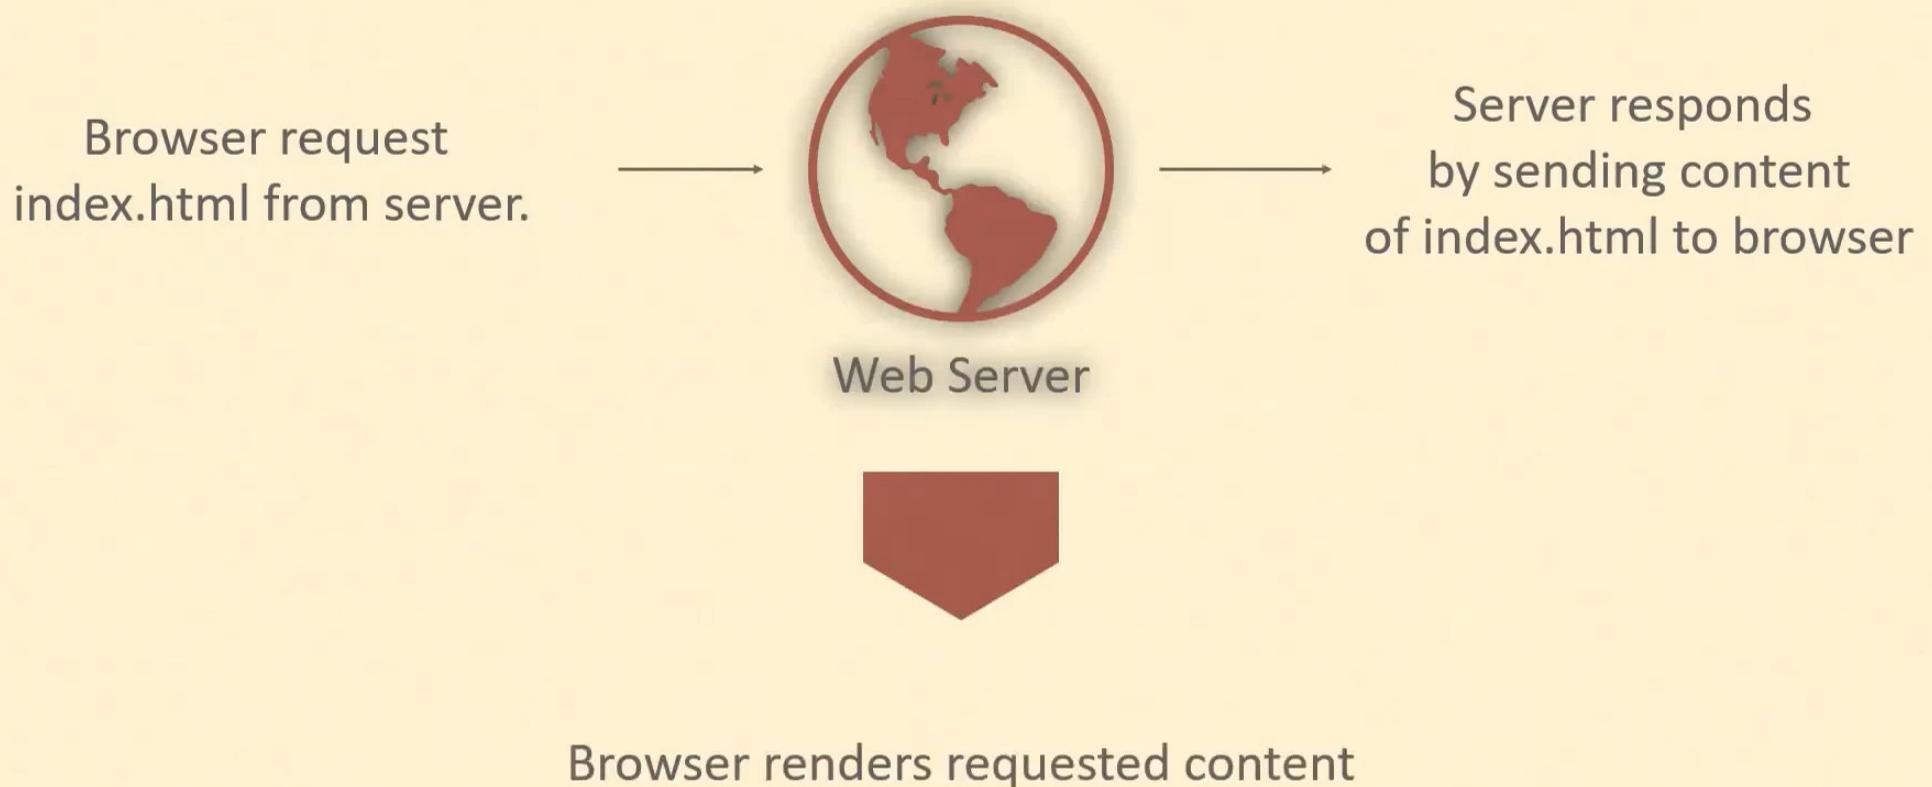

Most web pages you view are not static web pages.

Instead they are output from programs that run on web servers.

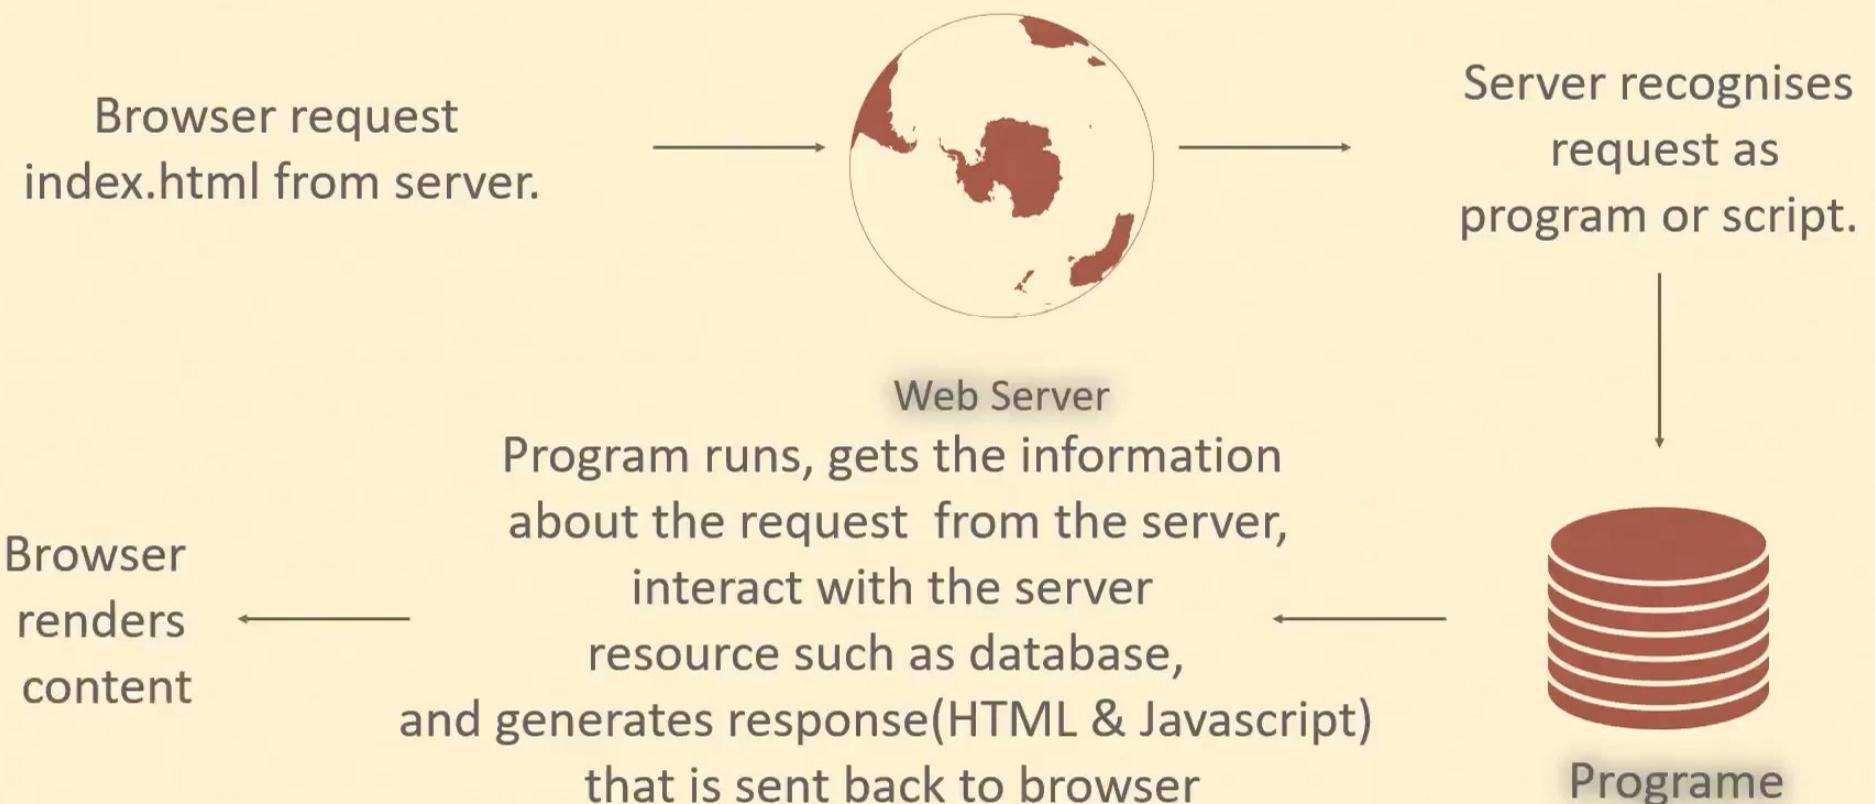

These programs can interact with server sources like database and XML Web service.

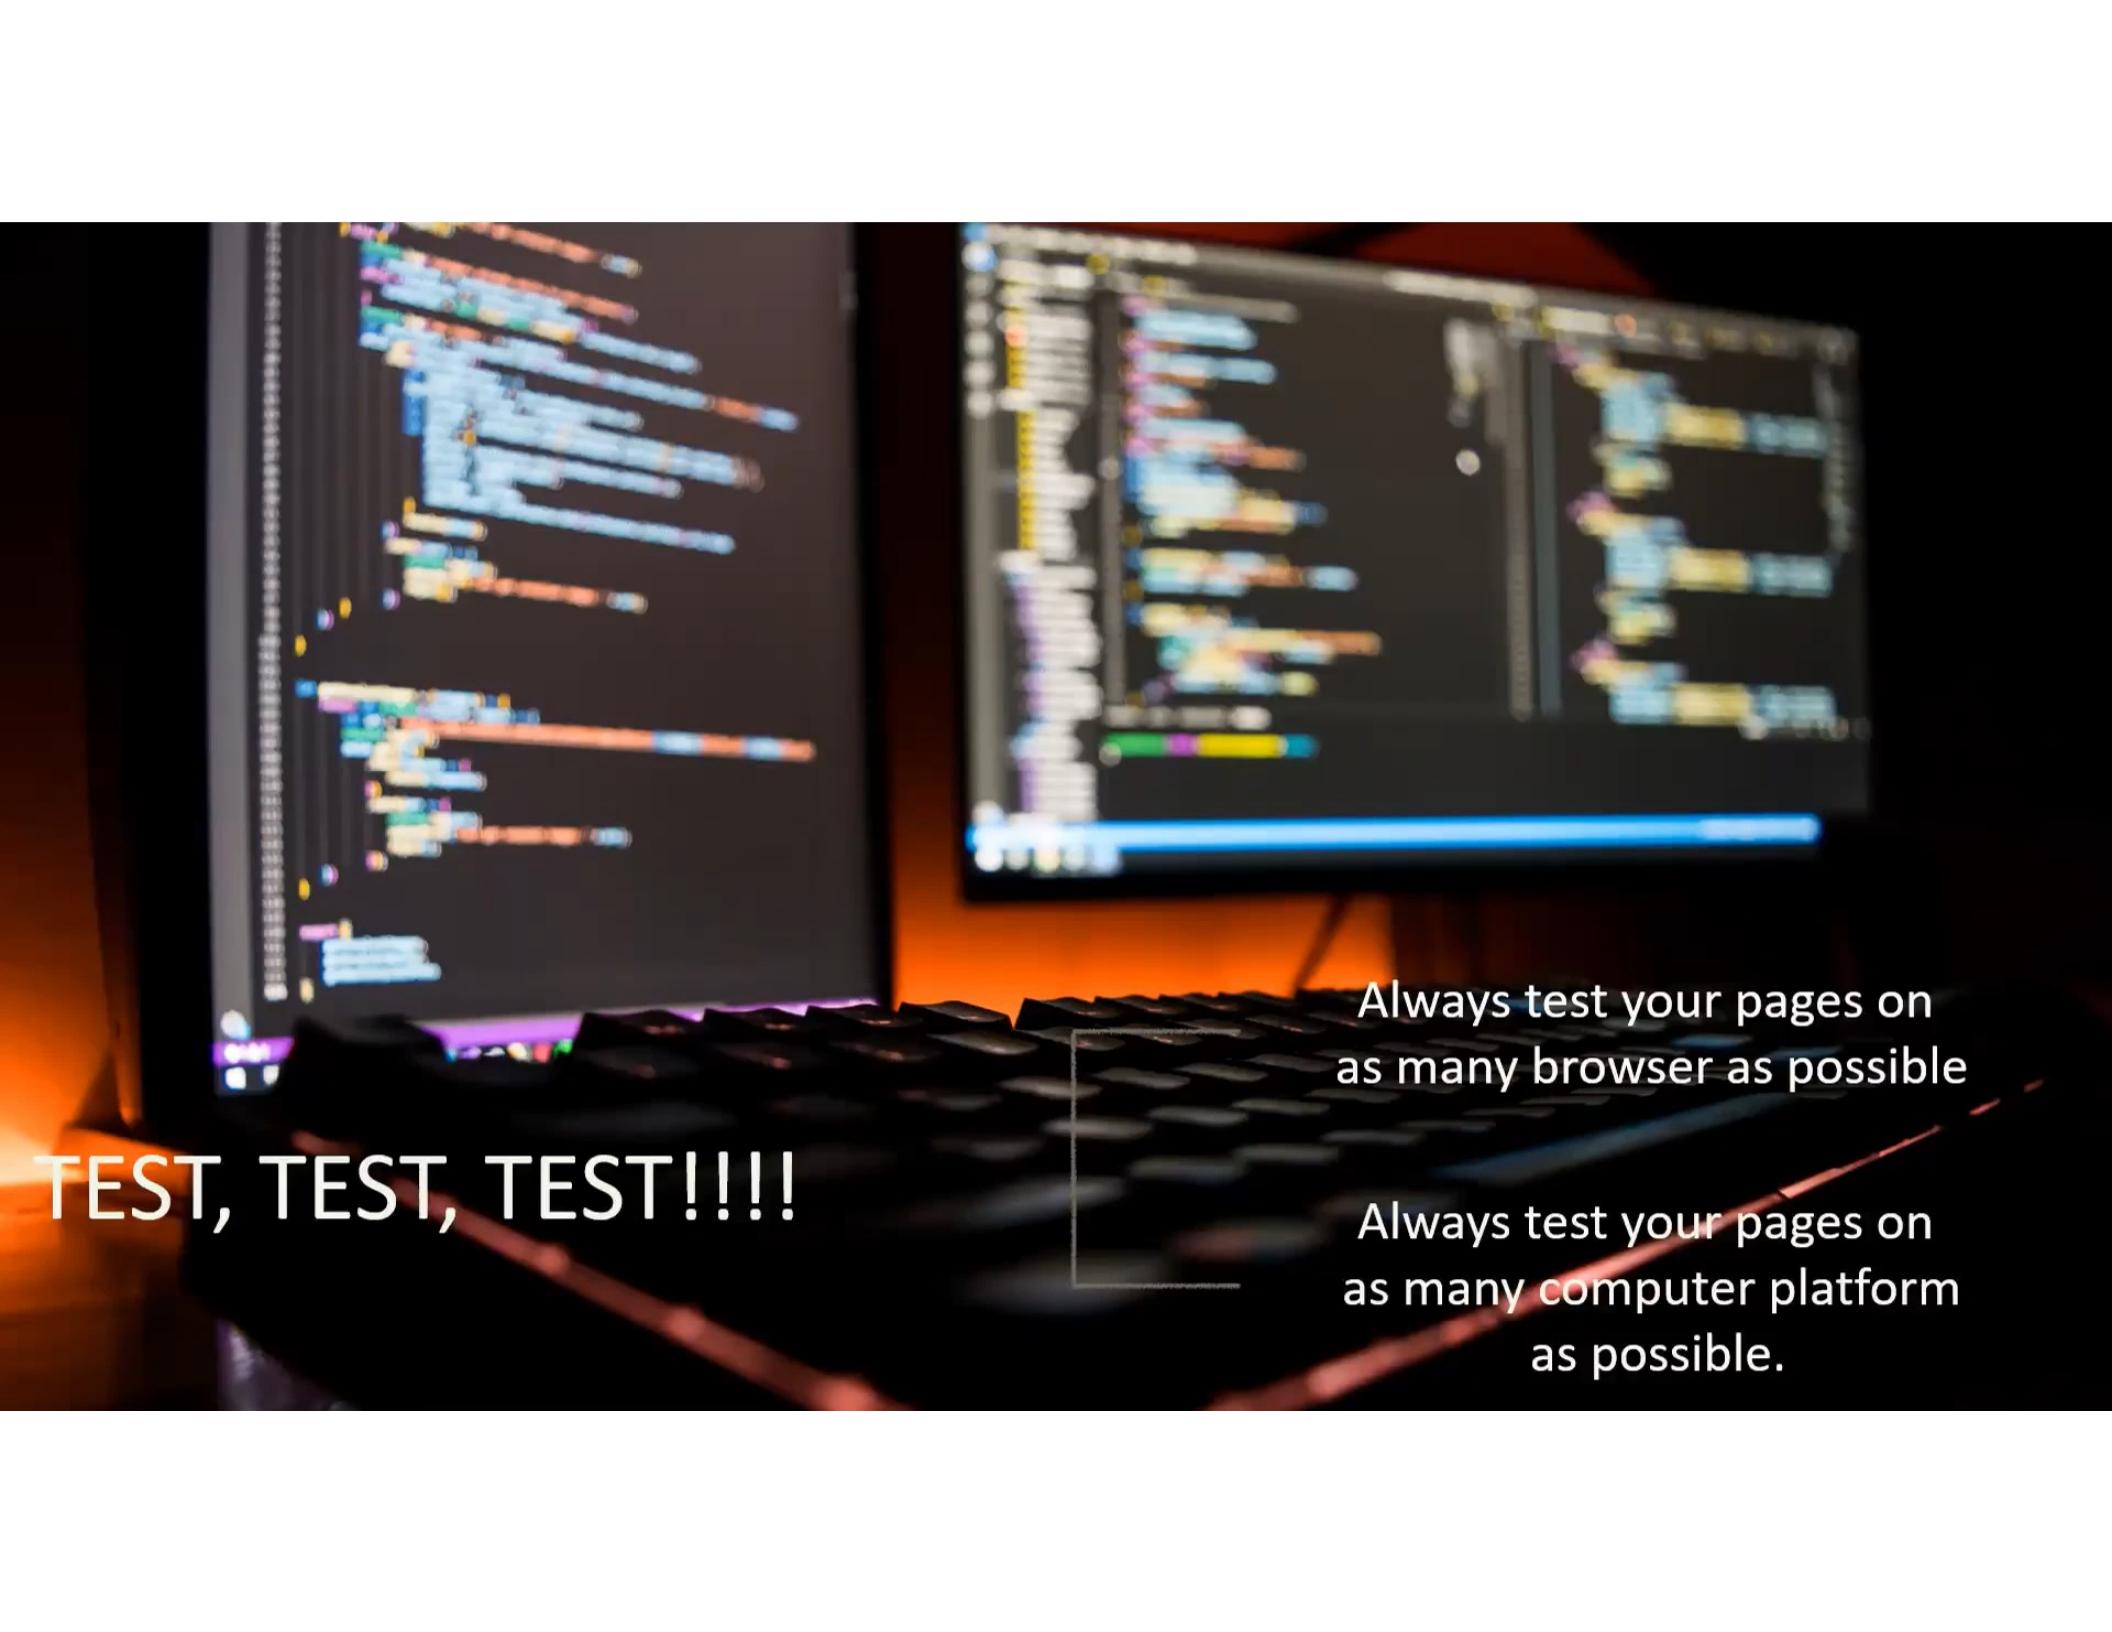

# STATIC WEB CONTENT

# DYNAMIC WEB CONTENT

# TEST, TEST, TEST!!!!

Always test your pages on  
as many browser as possible
