create your own url shortener free

Delete the code and paste new code and click the save icon, then go to save, then ask to change the name (put the same name which name in your google sheet)

```
var sheetName = 'Sheet1'
var scriptProp = PropertiesService.getScriptProperties()

function intialSetup () {
  var activeSpreadsheet = SpreadsheetApp.getActiveSpreadsheet()
  scriptProp.setProperty('key', activeSpreadsheet.getId())
}

function doPost (e) {
  var lock = LockService.getScriptLock()
  lock.tryLock(10000)

  try {
    var doc = SpreadsheetApp.openById(scriptProp.getProperty('key'))
    var sheet = doc.getSheetByName(sheetName)

    var headers = sheet.getRange(1, 1, 1, sheet.getLastColumn()).getValues()[0]
    var nextRow = sheet.getLastRow() + 1

    var newRow = headers.map(function(header) {
      return header === 'timestamp' ? new Date() : e.parameter[header]
    })

    sheet.getRange(nextRow, 1, 1, newRow.length).setValues([newRow])

    return ContentService
      .createTextOutput(JSON.stringify({ 'result': 'success', 'row': nextRow }))
      .setMimeType(ContentService.MimeType.JSON)
  }
}
```

An advertisement for a service. The top half is blue with white text: 'No EMIs till possession' and 'Savings up to ₹12 Lakh\*'. Below that is a yellow bar with text: 'Additional Savings of ₹50,000/- on every booking'. At the bottom left is a small 'T&amp;C Apply' link, and at the bottom right is a 'SHOW MORE' button.

This screenshot shows the 'New deployment' dialog box in Google Apps Script. The 'Select type' dropdown is open, revealing four options: 'Web app', 'API Executable', 'Add-on', and 'Library'. The 'Web app' option is highlighted with a mouse cursor. A large circular button with a gear icon is positioned below the dropdown. A message at the bottom of the dialog reads 'Please select a deployment type'. At the bottom right are 'Cancel' and 'Deploy' buttons. The background shows the main Apps Script interface with tabs like 'Code.gs' and 'Libraries'.

A screenshot of a code editor showing a snippet of JavaScript code. The code is intended to submit a form to a Google Sheets macro. It uses the Fetch API to send a POST request to a specific URL, passing the form data in the body. An alert message is shown if the request is successful, and an error message is shown if it fails. The code is highlighted in blue and black, and the background of the code editor is light gray.

The screenshot shows a Google Apps Script project in the Project Editor. A modal window titled "New deployment" is open, prompting the user to "Please select a deployment type". The modal has two tabs: "Select type" and "Configuration", with "Select type" being active. Below these tabs is a button labeled "Enable deployment types". At the bottom of the modal are "Cancel" and "Deploy" buttons. The background of the project editor shows the "Code.gs" file with some code and execution logs.

Cancel Deploy

A screenshot of the Google Apps Script Project Editor interface. A modal window titled "New deployment" is open in the foreground. The "Select type" dropdown is set to "Web app". Under "Description", the input field contains "web8.9". Under "Execute as", the dropdown menu is open, showing "Me (meghasingh18586@gmail.com)". Under "Who has access", the dropdown menu is open, showing "Anyone". At the bottom of the modal, there are "Cancel" and "Deploy" buttons, with the cursor hovering over the "Deploy" button. The background shows the main editor area with a file named "Code.gs" and some code snippets visible.

The screenshot shows a web browser window with the URL [techwebs.in/submit-custom-html-form-data-to-google-sheets](https://techwebs.in/submit-custom-html-form-data-to-google-sheets). The page title is "Building the HTML Form". The main content area contains a code snippet:

```
const scriptURL = 'https://script.google.com/macros/s/AKfycbxEu8dPtSznFhoQRH23nEFjzQfRFJL6AI3fLixXoNxCk5HBBZfn/exec'
const form = document.forms['google-sheet']

form.addEventListener('submit', e => {
  e.preventDefault()
  fetch(scriptURL, { method: 'POST', body: new FormData(form)})
    .then(response => alert("Thanks for Contacting us..! We Will Contact You Soon..."))
    .catch(error => console.error('Error!', error.message))
})
```
