

The screenshot shows a Figma design interface for a 'Job Portal'. The main title 'Job Portal' is centered at the top. Below it, there are two main sections: '1. Job Portal for the company' on the left and 'Tools for the Project' on the right.

**1. Job Portal for the company**

- a) Panel
  - i) Authentication -> Login and Sign UP
  - ii) Portal -> Form to Create Job , Table to populated the posted job details.
  - iii) List of candidates applied for Jobs
- b) Website to show all the jobs and form to apply
  - i) All the jobs posted from the company will be populated over here
  - ii) Form to apply Job.

**Tools for the Project**

- a) HTML
- b) CSS
- c) BOOTSTRAP ([getbootstrap.com](http://getbootstrap.com))
- d) PHP
- e) MySQL
- f) Xampp

**Getting started**

- Introduction
- Download
- Contents
- Browsers & devices
- JavaScript
- Build tools
- Webpack
- Parcel
- Accessibility
- RFS
- RTL

**Customize**

- Layout
- Content
- Forms
- Components
- Helpers
- Utilities

**Quick start**

Looking to quickly add Bootstrap to your project? Use jsDelivr, a free open source CDN. Using a package manager or need to download the source files? [Head to the downloads page.](#)

**CSS**

Copy-paste the stylesheet `<link>` into your `<head>` before all other stylesheets to load our CSS.

```
<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-beta3/dist/css/bootstrap.min.css" rel="stylesheet">
```

[Copy to clipboard](#) [Copy](#)

**JS**

Many of our components require the use of JavaScript to function. Specifically, they require our own JavaScript plugins and [Popper](#). Place **one of the following** `<script>`s near the end of your pages, right before the closing `</body>` tag, to enable them.

**Bundle**

Include every Bootstrap JavaScript plugin and dependency with one of our two bundles. Both `bootstrap.bundle.js` and `bootstrap.bundle.min.js` include [Popper](#) for our tooltips and popovers. For more

# Create a Responsive Sidebar

Step 1) Add HTML:

Example

```
<!-- The sidebar -->
<div class="sidebar">
  <a class="active" href="#home">Home</a>
  <a href="#news">News</a>
  <a href="#contact">Contact</a>
  <a href="#about">About</a>
</div>

<!-- Page content -->
<div class="content">
  ...
</div>
```

Step 2) Add CSS:

Example

```
/* The side navigation menu */
```

## Responsive Sidebar Example

This example uses media queries to transform the sidebar to a top navigation bar when the screen size is 700px or less.

We have also added a media query for screens that are 400px or less, which will vertically stack and center the navigation links.

**Resize the browser window to see the effect.**

Home

This example use media queries to tranform the sidebar to a top navigation bar when the screen size is 700px or less.

We have also added a media query for screens that are 400px or less, which will vertically stack and center the navigation links.

**Resize the browser window to see the effect.**

## Multiple targets

A `<button>` or `<a>` can show and hide multiple elements by referencing them with a selector in its `href` or `data-bs-target` attribute. Multiple `<button>` or `<a>` can show and hide an element if they each reference it with their `href` or `data-bs-target` attribute

Many of our components require the use of JavaScript to function. Specifically, they require our own JavaScript plugins and [Popper](#). Place **one of the following** `<script>`s near the end of your pages, right before the closing `</body>` tag, to enable them.

## Bundle

Include every Bootstrap JavaScript plugin and dependency with one of our two bundles. Both `bootstrap.bundle.js` and `bootstrap.bundle.min.js` include [Popper](#) for our tooltips and popovers. For more information about what's included in Bootstrap, please see our [contents](#) section.

```
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-beta3/dist/js/bootstrap.bundle.min.js"
```

**Copied!**

## Separate

If you decide to go with the separate scripts solution, Popper must come first (if you're using tooltips or popovers), and then our JavaScript plugins.

```
<script src="https://cdn.jsdelivr.net/npm/@popperjs/core@2.9.1/dist/umd/popper.min.js" integrity="
```

```
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-beta3/dist/js/bootstrap.min.js" integrity="
```

## Modules

If you use `<script type="module">`, please refer to our [using Bootstrap as a module](#) section.

## Full-width Jumbotron

If you want a full-width jumbotron without rounded borders, add the `.jumbotron-fluid` class and a `.container` or `.container-fluid` inside of it:

Example

```
<div class="jumbotron jumbotron-fluid">
  <div class="container">
    <h1>Bootstrap Tutorial</h1>
    <p>Bootstrap is the most popular HTML, CSS...</p>
  </div>
</div>
```

The screenshot shows the Microsoft Visual Studio Code interface with the following details:

- File Bar:** File, Edit, Selection, View, Go, Run, Terminal, Help.
- Title Bar:** config.php - Job Portal - Visual Studio Code
- Explorer View:** Shows the project structure under 'OPEN EDITORS' and 'JOB PORTAL'. Files listed include Login.php, index.php, jobs.php, header.php, career.php, style.css, register.php, and config.php (the current file being edited).
- Code Editor:** The 'config.php' file is open, containing PHP code for database connection and form handling. The code includes variables for server, username, password, and database, and logic for connecting to MySQL and handling POST submissions.
- Terminal:** The terminal window shows the command prompt and the output of running the application in cmd.
- Bottom Status Bar:** Displays the current branch (master), file count (4), git status, and system information like Ln 22, Col 12, Spaces: 4, UTF-8, CRLF, PHP, and the date/time (07:37).

Console

The screenshot shows the 'Structure' tab of the phpMyAdmin interface for creating a new table named 'jobs'. The table contains four columns: 'id' (primary key, INT), 'cname' (VARCHAR(50)), 'position' (VARCHAR(50)), and 'Jdesc' (VARCHAR(200)). The storage engine is set to InnoDB. The 'Collation' dropdown is currently empty. The 'Comments' and 'Storage Engine' sections are also visible. The 'PARTITION definition:' section is present but empty. The 'Preview SQL' and 'Save' buttons are at the bottom right. The browser's address bar shows the URL http://localhost/phpmyadmin/tbl\_create.php?server=1&db=jobs. The operating system taskbar at the bottom includes icons for various applications like File Explorer, Edge, and Task View.

Console

The screenshot shows the 'Structure' tab of the phpMyAdmin interface for creating a new table named 'jobs'. The table contains six columns: 'id', 'name', 'position', 'desc', 'kills', and 'CTC'. The 'id' column is defined as an INT type with a primary key constraint (PRIMARY checked). The 'name', 'position', and 'desc' columns are defined as VARCHAR types with a length of 50, 50, and 200 respectively. The 'kills' and 'CTC' columns are also defined as VARCHAR types with a length of 50. The 'Storage Engine' is set to InnoDB. The 'Collation' dropdown is empty. The 'Role comments:' field is also empty. The 'Partition definition:' section shows a placeholder for partitioning by an expression or column list. The 'Partitions:' field is empty. At the bottom right, there are 'Preview SQL' and 'Save' buttons, and at the bottom left, there is a 'Console' button.

Detailed description: This screenshot shows the 'Structure' tab of the phpMyAdmin interface for creating a new table named 'candidates' in the 'jobs' database. The table structure is defined with four columns: 'id' (type INT, length 11, primary key), 'name' (type VARCHAR, length 255), 'qual' (type VARCHAR, length 255), and 'year' (type VARCHAR, length 255). The storage engine is set to InnoDB. The 'Collation' and 'Attributes' sections are also visible. The 'PARTITION definition:' section is present but currently empty. At the bottom, there are 'Preview SQL' and 'Save' buttons.

one opening

**Skills Required:**JAVA

**CTC:**7LPA

Apply Now

Apply for Jobs

Name: Aamir

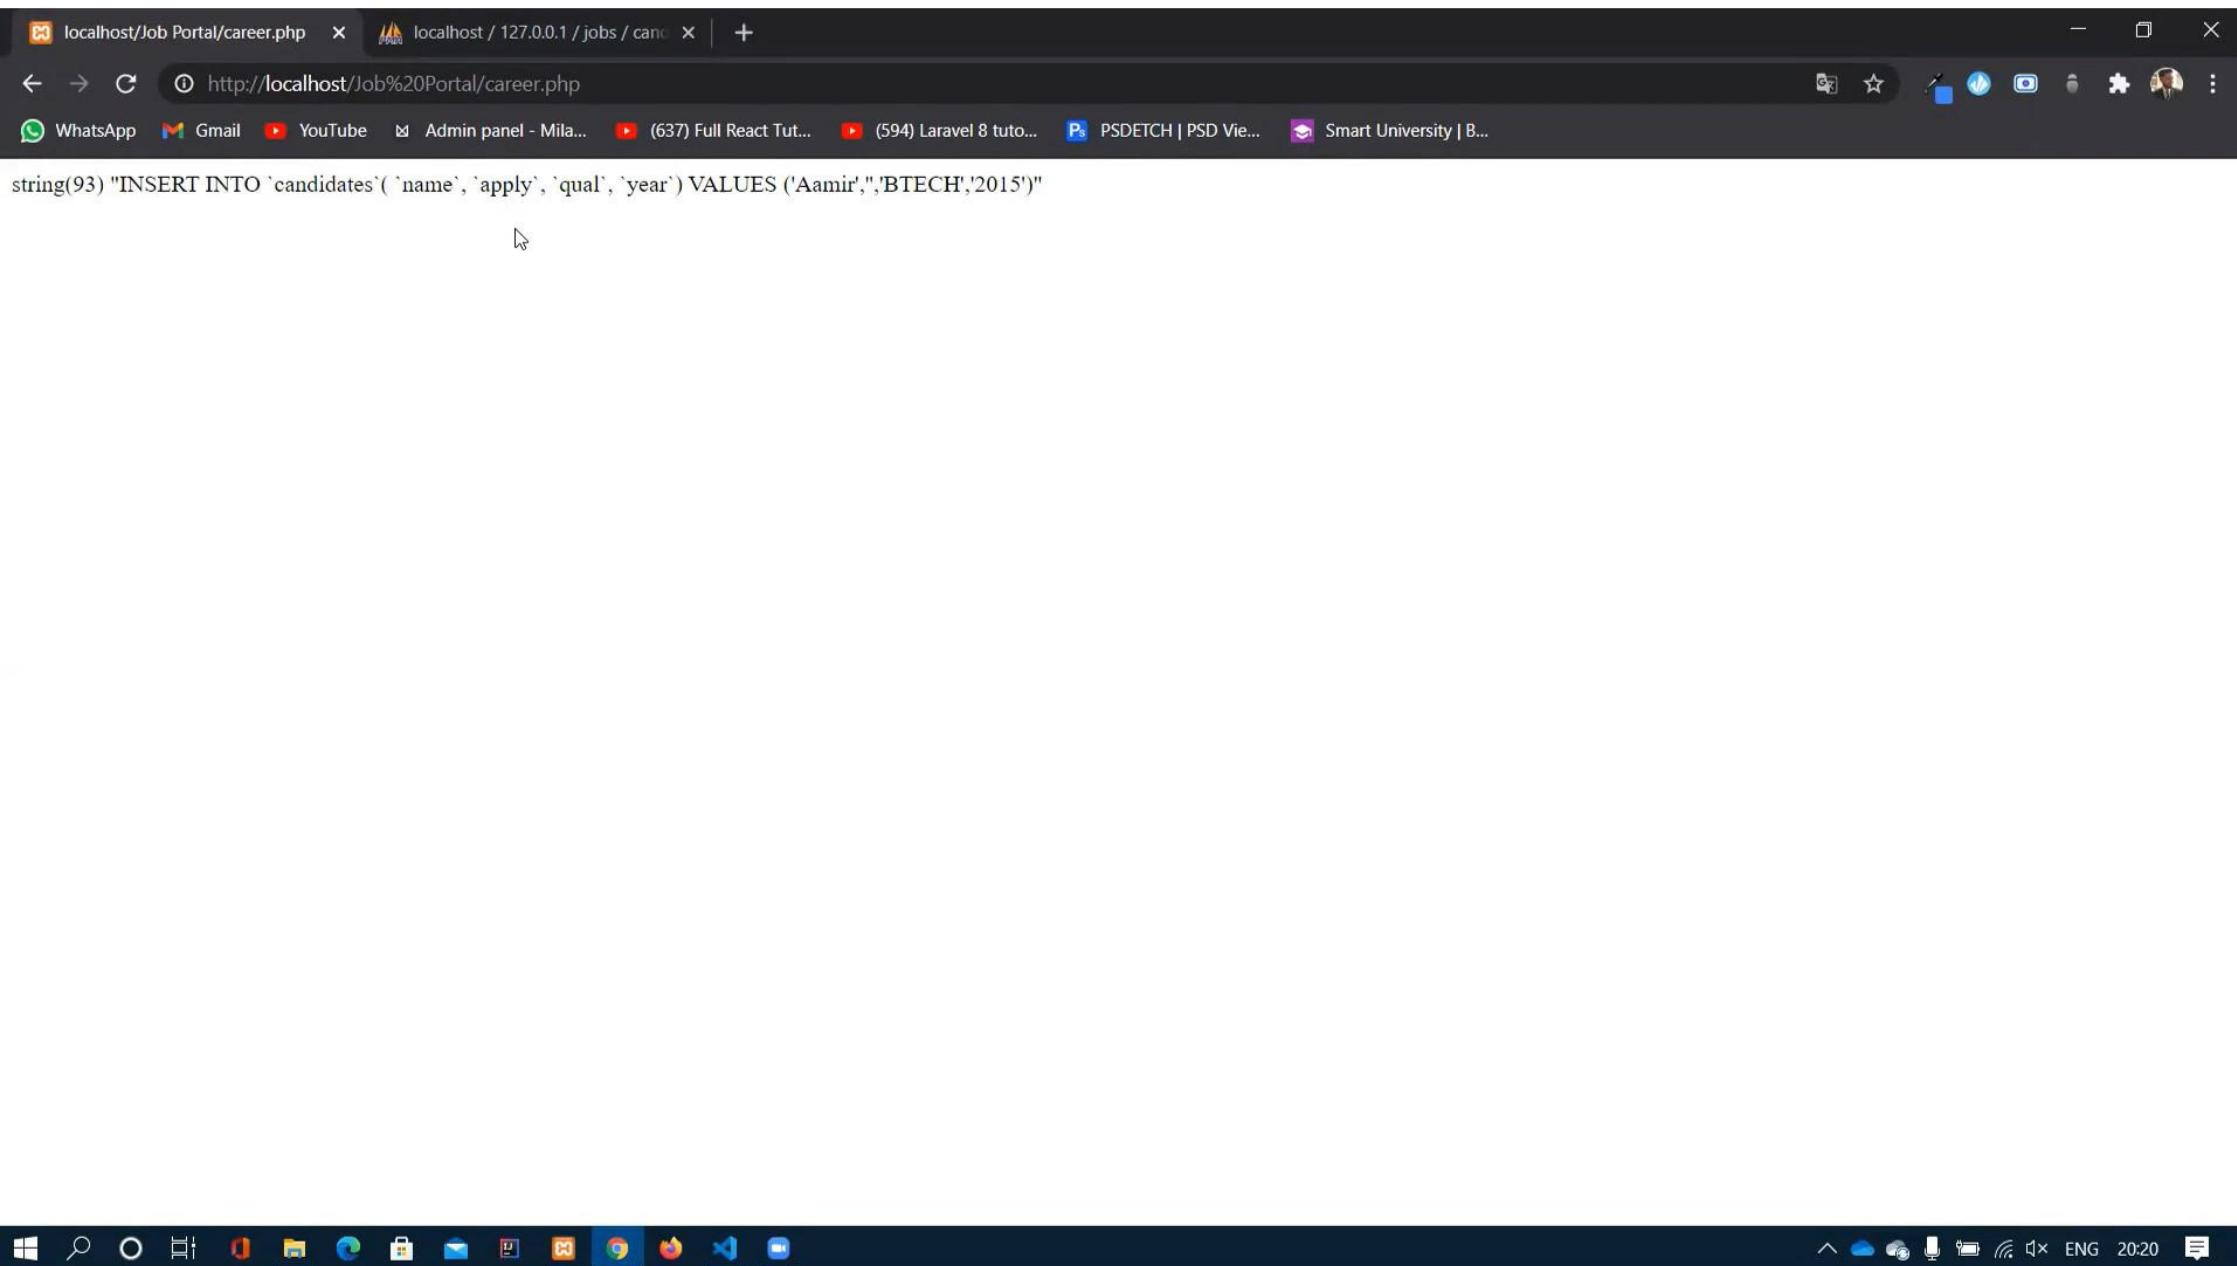

Applying For: PHP DEV

Qualification: BTECH

Year passout: 2015

Close Apply

This screenshot shows a job application interface. At the top, there's a header bar with browser tabs and a toolbar. Below that is a main content area with a large 'Job Portal' title and a sub-section for a 'PHP DEV' position at '1stop'. This section includes details about the opening, required skills ('PHP, HTML, CSS'), compensation ('CTC:3-5LPA'), and a blue 'Apply Now' button. To the right, there's another job listing for 'Java Dev' at 'ASUS' with one opening, required skills ('JAVA'), compensation ('CTC:7LPA'), and a blue 'Apply Now' button. A central modal window titled 'Apply for Jobs' is open, prompting the user to enter their name (Aamir), the position they're applying for (PHP DEV), their qualification (BTECH), and their year of graduation (2015). It also features 'Close' and 'Apply' buttons.

The screenshot shows the phpMyAdmin interface for the 'candidates' table in the 'jobs' database. The table structure is defined by columns: id, name, apply, qual, and year. A single record is present, with the 'name' field set to 'Aamir', 'apply' to 'PHP DEV', and 'qual' to 'BTECH'. The 'year' field is set to '2015'. The interface includes a toolbar at the top with links for Browse, Structure, SQL, and Export. Below the toolbar, a message indicates 'Showing rows 0 - 0 (1 total, Query took 0.0013 seconds.)'. The main area displays the table data with a row selection tool. At the bottom, there are buttons for printing, copying to clipboard, exporting, displaying a chart, and creating a view. A 'Bookmark this SQL query' section is also visible.
